

THE SAFE STEEL STRAP ALTERNATIVE

COMPOSITE STRAPPING

Narrowtex Composite Strapping is manufactured from high tenacity polyester yarns and encased in a high quality polymer coating.

Composite Strapping is often referred to as “Synthetic Steel” and is an effective alternative to Steel Strapping, Metal Banding and Plastic Strapping. Composite Strapping does not rust and therefore will not damage precious cargo during transit and storage.

Composite Strapping is designed to absorb impacts and load shifting during transit and unlike Steel Strapping will not snap or break.

QUALITY ASSURED

FEATURES & BENEFITS

- > The stiffness of composite strapping makes it easy to feed the strapping under pallets.
- > Composite Strapping is a safer alternative to Steel Banding.
- > The polymer encasing/shell ensures that during packing our Composite Strapping is not compromised by sharp edges or rough surfaces.
- > Our state of the art in-house laboratory ensures that the mixture used in our polymer provides for a consistent compound in every batch of strapping manufactured.
- > Composite strapping can be custom printed.

Product code	Width mm	Width inches	Breaking Strength kg	Breaking Strength pounds	Coil size metres	Coil size feet	Coils per pallet
NC40	13	1/2	310	685	1100	3610	90
