

# NARROWTEX

## SEATBELT WEBBING

Narrowtex manufactures and supplies seatbelt webbing for leading international original equipment manufacturers and aftermarket providers servicing the motor vehicle and aviation industries.

Seatbelt webbing is manufactured to stringent quality assurance standards and comply with global specifications. High tenacity polyester yarn is used to produce seatbelt webbing and different shades and pattern combinations are available. Webbing for seatbelts is available in cut to length format and can be customized for individual requirements. Various product finishes are utilized to achieve low friction extraction and retraction performance thereby improving seatbelt webbing comfort.

Technology agreements with international partners exist to ensure that Narrowtex stays abreast of international trends with regard to safety critical components.
